WHY GRAFTED EVERGREENS? When a choice evergreen is developed by selection or breeding, its characteristics, including color, shape, habit of growth and hardiness, can be carried to its offspring by grafting. It is almost impossible to get two seedling Junipers alike because of seedling variation. Grafted evergreens are a little more in cost, but are well worth the difference.

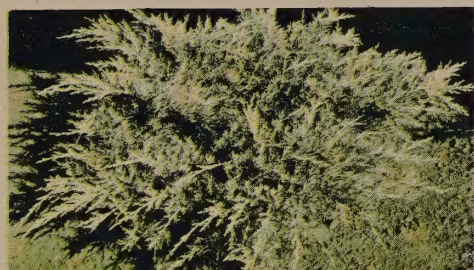

The evergreens listed on this page are large, well-furnished, balled and burlapped specimens; not light, bare-rooted plants. When shipped to you, they are crated or basketed for added protection. Complete instructions for planting and care come with each order.

RED CEDAR

SHEARED SPECIMENS FOR ALL LANDSCAPING USES.

The RED CEDAR or VIRGINIANA JUNIPER is one of the most useful and the hardiest of evergreens for the Great Plains Region. It has fine-textured foliage of bright green color. We can furnish sheared, balled and burlapped specimens for foundation plantings and for yard and park work. We can also furnish unsheared or natural trees for windbreaks, shelterbelts, hedges, or for park or roadside plantings. We can furnish these in small bare-root trees, small to medium-size potted trees or larger balled & burlapped trees. (See page 6).

Red Cedar may be kept small or any desired SHAPE or SIZE by shearing, which requires only a few minutes a year. This shearing makes them more dense and compact. Sheared specimens are used extensively as accent points in foundation plantings and landscapes, to frame entrances, etc. **BALLED AND BURLAPPED SHEARED SPECIMENS.** Not prepaid.

COLORADO SILVER CEDAR

SHEARED SPECIMENS

The Colorado Silver Cedar (*Scopulorum Juniper*) is very similar in habit of growth and hardiness to the Red Cedar, except the texture of the foliage is finer and the color is usually silvery green. Being grown from seed, the color of these trees will vary. (See "WHY GRAFTED EVERGREENS?" on page 2) **SHEARED SPECIMENS** are excellent for foundation plantings, **BALLED AND BURLAPPED.** Not prepaid.

24 to 30 in.	5.75 each; 2 for 11.00

BROADLEAVED EVERGREENS

Broadleaved Evergreens are a class of shrubs that retain their leaves throughout the winter. (except in the north). They are ideal to use in the foundation planting of the contemporary house because of their dwarf habit of growth and their pleasing combination with evergreens.

UPRIGHT EUONYMUS

This broadleaved evergreen has a natural upright habit of growth, attaining the eventual height of 3 to 4 feet. Use for an accent plant at the corners of your house, or at the entrance. Container-grown specimens. Not prepaid.

12 to 18 in.	\$3.00 each; 4 for \$11.00
--------------	----------------------------

DWARF JAPANESE BOXWOOD

(Buxus microphylla japonica). This is a hardy variety of Boxwood recommended especially for the rigorous conditions of our area. Should be planted only on the north or east exposures. Beautiful, dwarf, compact plants with dark green shiny leaves. Container-grown plants, 6 to 12 inches: \$3.25 each; 4 for \$12.00. Not prepaid.

MENTOR BARBERRY

Since this beautiful shrub holds its foliage nearly all winter, it is often classed with the Broadleaved Evergreens. A very rugged, strong, upright-growing shrub with thick, heavy, dark green leaves. It will grow anywhere, even in the hottest, driest places. Grows dense, compact and from 2 to 3 feet. Requires very little pruning or trimming. Prices are not prepaid.

SMALL BARE-ROOT RED CEDAR—for Hedges, Windbreaks, Etc.—Sturdy 2 yr. old Red Cedar seedlings, grown right here in Salina. All stock will be dug fresh, the roots dipped in mud and then shipped immediately. Order early so that your supply can be shipped when we start digging late in March or early in April. (Bare-root Cedars cannot be planted in the fall) Note our attractive prices for the larger quantities. Quantities of 100, 500 and 1000 are not prepaid.

COLORADO SILVER CEDAR

The Colorado Silver Cedar (*Scopulorum Juniper*) if allowed to grow **UNSHEARED** or **NATURAL**, make excellent windbreaks, shelterbelts or large hedges. It also can be used as single or group specimens for park or roadside plantings. For western Kansas and eastern Colorado this tree is considered even hardier than the Red Cedar. See page 4 for sheared specimens for landscaping.

POTTED SILVER CEDAR—Grown and planted just like Potted Redcedar (See above). Not prepaid.

CHINESE ARBORVITAE

Chinese Arborvitae makes ideal hedges for year-round beauty. They can be kept clipped or boxed nearly any size from 3 to 10 feet high. Plant bare-root plants 18 inches apart for clipped hedges. For tall screens, backgrounds or windbreaks, plant 3 to 6 feet apart. Plant balled and burlapped plants 2 feet apart for clipped hedges. Bare root plants cannot be planted in the fall. See page 4 for specimens for landscaping.

POTTED CHINESE ARBORVITAE—Not prepaid.

LARGER, BALLED & BURLAPPED CHINESE ARBORVITAE FOR IMMEDIATE EFFECT—It usually takes 3 or 4 years to get the small bare-root plants to make a hedge 3 feet high, so for those who do not want to wait so long, we have these larger balled and burlapped trees. By growing them closer together in the row and not shearing them, we are able to offer them at these low prices so that you can afford to plant a hedge that will give you almost immediate effect. These can be planted either spring or fall. Not prepaid.

Buy nursery stock produced in the Great Plains Region . .

We cannot overemphasize the importance of buying nursery stock produced in and adapted to the great plains region. We have over sixty acres of fine, healthy, growing nursery stock right here in Salina. Naturally, plants produced in and acclimated to this area will grow and thrive better than those shipped in from long distances.

Buy Properly Stored Nursery Stock . .

Our hardy nursery stock, after being dug from our fields, is graded and processed and stored in our modern, controlled storages, out of the sun, wind and dry heat. Our stock is not coated with wax or pre-packaged, nor is it kept in warm sales rooms until it is barely alive. All our evergreens are dug fresh from our fields especially for your order.

SHADE TREE AND SHRUB SEEDLINGS

Protect your live stock, poultry, feed lots and your home, vegetable garden and orchard with properly placed windbreaks. The protection from the hot winds in summer and cold winds in winter will make your cows give more milk, your hens lay more eggs, your steers make better gains, your gardens and orchard produce better, your home easier to heat and the farm more pleasant and beautiful. They also protect your soil from wind and water erosion. Woodlots turn waste land into profitable land. Let us help you plan your windbreaks. We will be glad to assist in the arrangement and advise varieties. Also remember our seedlings are Salina-grown and therefore adapted to this region.

Prices listed below are available (see parcel post instructions on page 44) except those printed in shaded area. Those printed in shaded area must be sent express or truck freight collect.

MULTIFLORA ROSE

Our state and federal conservation agencies are recommending this for a living fence or hedges and we recommend it very highly for the great plains region. It is also recommended for erosion control and wild life refuge. Multiflora rose has small thorns and makes a bushy hedge about 6 to 8 feet tall and almost as wide if not trimmed. White flowers in June followed by red fruits which birds like. Plant 12 to 18 inches apart. Very hardy.

Above: Trimmed or sheared hedge of *Spirea van houtte*

Spirea van houtte

The two photographs above show the beauty of *Spirea van houtte* (sometimes called Bridalwreath) either as a natural blooming hedge or a sheared formal hedge. This is one hedging material that will thrive in any soil or in sun and shade alike. Plant 1 foot apart for a sheared hedge or 2 feet for a natural hedge. FOR LARGER SPECIMEN SHRUBS SEE PAGE 18.

Chinese Elm Hedges

The adaptability of CHINESE ELMS for clipped hedges, windbreaks, screens, etc., is unquestioned. For clipped hedges 3 feet or under, plant seedlings 6 inches apart. For taller hedges plant 9 to 12 inches apart. For tall windbreaks plant 3 to 6 feet apart, depending on the height and density desired.

We grade our seedlings, putting the more branched and best adapted to this purpose in the hedge grade. When ordering Chinese Elms for hedges or windbreaks, be sure to say you want the HEDGE GRADE.

Peking Cotoneaster

(*Cotoneaster acutifolia*). A medium-growing, many-branched, graceful shrub with dark, dark green foliage. It grows about 5 feet tall. We consider this perfectly suited for either a sheared or especially a natural hedge of medium height. Peking Cotoneaster will grow as well in shady areas as it does in hot, dry, sunny areas, and it is especially adapted to the western areas of the great plains. Bears black fruit in the fall; foliage has brilliant fall color. Plant 24 to 30 inches apart.

Teucrium Hedges

An ideal plant for the low border or for edging flower or rose beds. It has glossy, dark green EVERGREEN foliage. It is the best substitute for boxwood hedges in our area. It responds wonderfully to shearing and may be kept clipped as low as five or six inches into a very dense, compact hedge. If left unclipped, it grows on 8 to 12 inches high and bears spikes of tiny lavender-pink flowers. .50c each; 10 for \$4.50; 50 for \$20.00; 100 for \$35.00.

WINTERBERRY

EUONYMUS PATENS—MAKES A BEAUTIFUL THICK HEDGE THAT KEEPS ITS LEAVES ALL WINTER LONG.—(Sometimes called Winter-green)

Euonymus patens (Winterberry), when planted 6 inches apart and kept sheared or boxed, forms a most beautiful low hedge that keeps its leaves all winter long. It is a vigorous plant that grows into a thick, dark green, attractive hedge. It may be planted farther apart for larger hedges. Dense hedges up to 3 to 5 feet are easily possible. It may be left to grow naturally if desired. The photograph to the left, taken at the Nelson Art Gallery in Kansas City, shows an excellent example of the use of Winterberry or Euonymus patens as a low, clipped hedge.

Very few plants will make a hedge in both full sun and shade. Winterberry does equally well in both situations. It is very hardy and will grow in any soil.

Privet Hedges

AMUR RIVER PRIVET (North)—Also called Hardy Russian Privet. The hardiest and most popular Privet for low, clipped hedges for the great plains region. If you are in doubt as to what kind of hedge to plant, we recommend Amur River Privet very highly. Upright grower, foliage is glossy-green and will not blight or winter-kill. Generally kept sheared from 2 to 4 feet high. Plant 6 to 12 inches apart and 3 to 4 inches deeper than they were in the nursery.

COLORFUL FLOWERING SHRUBS

Rose of Sharon

See Colored Picture on Page 19

A very upright growing shrub, fine for accent in shrub masses and ideal for foundation plantings. One of the very few shrubs that blooms freely in the late summer and fall. We grow the following five varieties:

ANEMONAEFLORUS—Bright pink, double.

ARDENS—Deep violet, double.

BANNER—White with a red center, double.

LUCY—Deep red, double.

18 to 24 inches..... 1.10 each; 3 for 3.00

2 to 3 ft..... 1.25 each; 3 for 3.45

Our collection of flowering shrubs is one of the most extensive for our great plains region. With this fine collection of shrubs to select from, the home-owner has an opportunity to increase the attractiveness of his grounds at very reasonable cost. Look over our complete selection on pages 16, 17, 18, 19 and 20.

PINK FLOWERING ALMOND—(Pictured to the left). These fine shrubs bloom early, in May, right after Forsythia. The dainty rosette-like flowers are very double, pastel pink and completely cover the entire plant from top to bottom. Makes a rounded, compact bush 3 to 4 feet tall. Excellent for foundation plantings.

18 to 24 inches 1.50 each; 3 for \$4.20

BARBERRY, GREEN—(Pictured to the left). Popular low-growing shrub, well branched, dense and compact. The bright green foliage turns a beautiful bronzy-purple-red in the fall. Has red berries that hang on until spring. Very hardy, very easy to grow and rust-resistant.

15 to 18 inches \$.90 each; 3 for \$2.55

18 to 24 inches 1.15 each; 3 for 3.30

BARBERRY, RED—(Pictured on page 19) This is one of the most brilliantly colored shrubs in cultivation. Lustrous purple-red foliage, brightening in the summer and turning orange-scarlet in the winter. Otherwise similar in growth habit to Green Barberry. Very hardy and rust-resistant.

15 to 18 inches.....\$1.40 each; 3 for \$4.05

PEKING COTONEASTER (*Cotoneaster acutifolia*)—A very attractive shrub with glossy, rather small, dark green leaves; slender, graceful branches. Produces black fruit in the fall. Very hardy and adapted to the great plains region. POSTPAID.

12 to 18 inches.....\$1.00 each; 3 for \$2.70

18 to 24 inches..... 1.10 each; 3 for 3.15

SPREADING COTONEASTER (*Cotoneaster divaricata*)—See broadleaved evergreens, page 5.

DWARF WINGED EUONYMUS (*E. alatus compactus*)—(See picture on page 20). Sometimes called Burning Bush. Bears yellow flowers in May and June followed by red berries in the late summer and fall. During the regular season, the foliage is an attractive dark green, turning to a brilliant crimson red in the fall. The unusual corky wings on the bark gives great interest and winter character to this shrub. Grows to be a compact, bushy plant, excellent for foundation plantings or individual settings.

18 to 24 inch.....\$3.00 each; 3 for \$8.25

Hansen's Bush Cherry

(*PRUNUS BESSEYI*)—Because this shrub is almost always featured for its fruit bearing qualities, its ornamental value is often overlooked. In fact if it bore no fruit at all it would be worthy of a place in the landscape. The foliage has an unusual blue-green tinge. The habit of growth is graceful and it never gets too large. Best of all, in the fall the foliage changes to a brilliant purple and crimson. Large black fruits, good for preserves. About 4 feet.

18 to 24 inches..... .60 each; 3 for 1.65

Nanking Cherry

(*Prunus Tomentosa*)—One of the most outstanding shrub-form cherries. At the end of April each joint blooms with a flower, pink in the bud, but white when open with red under-petals. The decorative fruit, which can be used for garden or indoor display, is red and edible. Very attractive foliage. Very hardy and grows about 5 feet tall.

18 to 24 inches.....\$1.20 each; 3 for \$3.45

2 to 3 feet..... 1.50 each; 3 for 4.20

3 to 4 feet..... 2.25 each; 3 for 6.60

BEAUTY BUSH—(Pictured on page 19). This fast-growing shrub is completely covered with lovely pink flowers in May. Gracefully arching branches. Very hardy. Grows 4 to 6 feet high.

12 to 18 inches.....\$1.65 each; 3 for \$4.80

18 to 24 inches..... 1.80 each; 3 for 5.25

2 to 3 feet..... 2.25 each; 3 for 6.60

DOGWOOD, REDTWIG, BAILEYI VARIETY—(Pictured on page 19). New, improved variety of Redtwig Dogwood. A hardy, vigorous shrub producing small white flowers in April and May, followed by porcelain-blue fruit. Its red branches make it attractive in winter. Grows 4 to 6 feet tall.

18 to 24 inches.....\$1.35 each; 3 for \$3.90

2 to 3 feet..... 1.65 each; 3 for 4.50

Forsythia

SEE COLOR PICTURES, PAGES 19 & 20

GOLDENBELL FORSYTHIA (*Forsythia spectabilis*)—The first shrub to bloom early in the Spring. Its golden-yellow flowers completely cover its light green branches. Grows 6 to 8 feet tall in sun or partial shade. Grows in any soil. Hardy and easy to grow.

LYNWOOD GOLD FORSYTHIA—(Pictured on page 20). This deep yellow variety was originated in Ireland. The branches are erect and literally smothered with large, full, individual golden blossoms. Presents an outstanding display in any weather.

SPRING GLORY FORSYTHIA—(Pictured on page 19) The first shrub to bloom in early spring. Far superior to the old fashioned sorts and is much more showy. It blooms young and its brilliant and large, pale yellow flowers completely cover the branches, making a cheerful display in the early spring. Hardy and easy to grow. Does well in ordinary soil.

VITEX (Hardy Lilac Chaste-tree)—An extremely hardy shrub resembling Butterfly Bush but has much more attractive foliage. Blooms all through the summer with spikes of beautiful lilac-blue flowers with a delightful spicy fragrance. Easy to grow and thrives in hot, dry locations. Grows 4 to 5 feet high.

2-Year, Heavy Grade.....\$1.00 each; 3 for \$2.70

RED FLOWERING SPIREA (froebeli)—For compactness and foliage clear to the ground, this low-growing shrub can hardly be equaled. Blooms with flat clusters of rosy-red flowers in May and June and intermittently throughout the summer. Very hardy. Grows about 2 feet tall.

15 to 18 inches.....\$1.10 each; 3 for \$3.00

SPIREA VAN HOUTTE THE ALL-PURPOSE SHRUB

(Sometimes called Bridal Wreath). This is deservedly America's most popular and widely planted shrub. In the spring, it is a solid mass of snowy white blossoms. The graceful, arching branches add to the beauty of its flowers in the spring, the foliage in the summer and to its branching habit through the winter. You can plant it any place . . . it will grow in the sun or shade or on any side of the house, or even under large shade trees. It will thrive in any soil.

New EVERBLOOMING HYBRID TEA ROSES

ALL AMERICA ROSE SELECTIONS

This is a non-profit committee, nationally and internationally recognized as the most important rose testing organization. Each year, AARS scientifically tests and selects the best of each year's rose introductions for national awards. All rose entries are planted in 18 test gardens distributed throughout America. Competent judges score the entries over a period of two years, and at the end of the two year period, the top scoring entry is given the All-America Award. You can be certain that any AARS winner is one of AMERICA'S FINEST ROSES.

The Patented Hybrid Tea Roses listed below are supplied in heavy grade only.

CHRYSLER IMPERIAL—(P. P. 1167). (Pictured on page 26). AARS winner for 1953. Its iridescent color is unmatched by any other red Rose. Vivid, rich crimson with darker overtones of glowing oxblood red. Long, tapering buds opening to large flowers borne on strong stems. Abundant and semi-glossy foliage makes this an excellent garden shrub. \$2.50 each; 3 for \$6.60.

DUET - AARS Winner for 1961

(Pictured above right). Pat. No. 1903. Unique bi-color, displaying two unusually warm and lovely shades of pink. The inner face of the petals is a soft salmon pink . . . reverse is a rich shade of near crimson. Medium size, double flowers are beautifully formed. The vigorous, free-branching plant produces luxuriant foliage. Exceptional mildew resistance. \$3.50 each; 3 for \$9.30.

GARDEN PARTY—(Pictured above right). Plant Patent No. 1814. A picture pretty rose with ivory petals blending into creamy tones and delicately tipped at the outer edges with apple blossom pink. A huge flower with long buds and marvelous form. \$3.00 each; 3 for \$7.95.

GOLDEN MASTERPIECE—(Pictured above right). Pat. No. 1284. A new rose. Truly a masterpiece with enormous, fragrant, high-centered, golden yellow flowers. Disease-resistant, glossy foliage on a strong plant. \$3.00 each; 3 for \$7.95.

KORDES PERFECTA—Plant Pat. No. 1604. (Pictured on page 26). The new descendant of the famous Peace Rose. The bud begins to show color as the petals separate, and the color is constantly changing. The basic color is cream-white, lined with pink and the edges of the petals appear to be dipped in carmine. The mature flower is a full 4½-5 inches, long-lasting and is a brilliant suffusion of pink, white and subtle yellow. Very fragrant, strong growing. \$3.50 each; 3 for \$9.30.

MOJAVE—(P. P. 1176). (Pictured on page 26). AARS winner for 1954. The color is a glowing, radiant apricot-orange, highlighted with other warm tints of nasturtium-red, scarlet and vermillion. Every long bud and perfect bloom is borne on a long, straight single stem. The plant is upright and vigorous with handsome foliage. \$2.75 each; 3 for \$7.20.

NEW YORKER—(P. P. 823). (Pictured on page 26). The real red, red Rose! Brilliant red color that does not fade or blue in hot weather. Plant is sturdy and vigorous. The buds open slowly into very large flowers of scarlet with rosy-red undertones, overlaid with rich velvety sheen. \$2.50 each; 3 for \$6.60.

PEACE—(P. P. 591). (Pictured on page 26). The best Rose ever created. AARS winner for 1946. The perfect buds open slowly into large, fragrant, fully double flowers. Its greatest charm is the changing panorama of colors. The buds are rich gold, edged with bright pink. As the outer petals unfold, the gold changes to canary then lightens to creamy ivory. The pink edge gradually deepens and becomes broader so the fully open flower appears sparkling pink with a creamy-yellow base. Last unusually long at all stages. Vigorous, healthy, free-blooming bush. \$2.50 each; 3 for \$6.60.

TIFFANY—(Pictured on page 26) (Patent No. 1304). AARS winner for 1955. A new Hybrid Tea Rose of beautiful Phlox-pink; double, high-centered blooms. Long, pointed buds are deep pink with golden yellow shadings at the base. Flowers are borne singly on long stems. Outstanding fragrance. \$2.75 each; 3 for \$7.20.

WHITE KNIGHT—(Pictured above). (Patent No. 1359). 1958 AARS winner. The first white hybrid tea rose ever awarded the coveted AARS honor. Truly spectacular white hybrid tea rose with superb form of both the bush and the flower. The satiny-white blossoms hold their purity color on long stems ideal for cutting. The 35 petals roll loosely outward achieving a stunning effect in the open flower. \$3.00 each; 3 for \$7.95.

the new **EVERBLOOMING FLORIBUNDA ROSES**

FLORIBUNDA ROSES are hardy, disease-resistant, long-lived and need very little care. The flowers come in clusters and are always in bloom from Spring until freezing weather; even the early frosts do not stop them. Plant them in solid beds, masses or in groups in front of shrubs and evergreens. They make excellent hedges and are fine for cutting. Plant them in the foundation planting for color accent or under picture windows. Should be planted 18 to 24 inches apart.

CIRCUS—(Pictured on opposite page). Patent No. 1382. AARS winner for 1956. The predominate color is yellow with tight buds richly marked with red. As the buds unfold, they offer an ever-changing succession of delightful shades of yellow, orange, buff, pink and red. Stems are straight and sturdy, fine for cutting. \$2.50 each; 3 for \$6.60.

FASHION—(Patent No. 789). Picture on opposite page. AARS winner in 1950. This new and uniquely colored Floribunda is a blending of coral and gold, quite different than any other color in Roses. The little buds of Fashion open out into semi-double blooms which retain their delightful color. The attractive 2½ to 3 foot plant is in bloom almost all the time. A popular favorite everywhere. \$2.00 each; 3 for \$5.25.

IVORY FASHION—(Pictured above). Patent No. 1688. AARS for 1959. Buds resemble those of a Hybrid Tea Rose and the high centered flower is almost 4 inches wide when open. The ivory color is set off by a suggestion of yellow in the bud stage and the petals hold well after opening. The plant grows about 30 inches high. Bloom period is unusually long. \$2.50 each; 3 for \$6.60.

FIRE KING—(Pictured on opposite page). Patent No. 1758. AARS for 1960. Iridescent vermilion—solidly brilliant. Long lasting fully double flowers of perfect form, open slowly from blood-red, pointed buds. Upright vigorous plant with a quantity of dark rich green foliage. \$2.50 each; 3 for \$6.60.

GOLDILOCKS—(Pictured above). Patent No. 672. Rich golden yellow buds, ovoid in shape. Long-lasting, hardy and vigorous. \$1.75 each; 3 for \$4.65.

JIMINY CRICKET—(Pictured on opposite page). Patent No. 1346. AARS Winner for 1955. A new Floribunda featuring tangerine-red buds, opening to coral-orange. Vigorous, upright growth and prolific blooming habit make it ideal for hedges, color masses and border edges. Cut flowers hold well for indoors. \$2.00 each; 3 for \$5.25.

PINOCCHIO—(Pictured on opposite page). The rose is literally covered throughout the season with immense clusters of perfect baby roses in the brightest cheeriest, yet daintiest shades of salmon flushed with gold. It is ideal to plant in shrub borders and evergreen plantings, and particularly effective in continuous summer and fall color after the flowering shrubs are done. Extremely hardy and always in bloom with many gay and colorful flowers on every bush. \$1.50 each; 3 for \$4.20.

RED PINOCCHIO—(Patent No. 812). (Pictured on opposite page). The buds of this delightful little floribunda are a deep, satiny carmine on the outside—and bright carmine on the inside. As the flower matures, it gives a velvety cast to the lovely cup-shaped bloom. The bushy, upright plant is vigorous and extremely hardy. \$1.75 each; 3 for \$4.50.

YELLOW PINOCCHIO—(Patent No. 992.) (Pictured on opposite page). The newest member of the Pinocchio family. Great masses of blossoms in an apricot-yellow color on a sturdy bush about 2½ feet tall. When at the peak of bloom, it is a rounded mound of yellow. \$1.50 each; 3 for \$4.20.

TEXAN—(Patent No. 1471). (Pictured above). Red as a prairie fire . . . tall as a ten gallon hat . . . softly scented as a southern belle. This red, red rose is a cross between Peace and Improved LaFayette. Big red Roses in large clusters make the **TEXAN** a whopping beauty in the garden. \$2.25 each; 3 for \$6.00.

VOGUE—(Patent No. 926). (Pictured above). A new Floribunda with its own unique, brilliantly glowing cherry-coral color. The individual flowers, 3 to 4 inches in diameter, are Hybrid Tea shaped, with perfect, high-centered form. They open slowly from a dark cherry, ovoid bud to the delightful cherry-coral open flowers with a rich fragrance. AARS award winner for 1952. \$2.00 each; 3 for \$5.25.

Old Favorite **FLORIBUNDAS**

PRICES: (on the six varieties below only) \$1.50 each; 5 for \$6.50; 10 for \$12.00.

EUTIN—Large clusters, often 50 or more flowers, of double deep red flowers. Healthy, hardy, vigorous and free-blooming. About 24 inches tall.

FLORADORA—Brilliant cinnabar red blooms, touched with scarlet and geranium. Very hardy and prolific. In bloom from early June until frost.

IMPROVED LAFAYETTE—(Pictured on page 27). One of the hardest and best bedding and border roses. Produces large clusters of bright cherry-crimson flowers in great abundance.

ROSENELFE—Graceful clusters of dainty, LaFrance pink flowers. Color holds well in the hottest sun. A fine grower with excellent foliage.

SUMMER SNOW—Once a patented variety. The most prolific of white floribundas. Blooms all the season with great "drifts" of beautiful large clusters like mounds of snow.

WORLD'S FAIR—This beauty was the first rose to win the All-America award. The very large petals are cherry red as the flower opens. The double flowers pass through several darker shades to deep red velvet.

Everblooming **BABY ROSES**

GARNETTE—(Pictured on page 27). Produces petite flowers about 2 inches across of deep garnet red. Flowers are borne in clusters of 15 to 20 on a plant growing 18 inches high. Foliage is crinkled and holly-like. Use for borders or planting boxes. \$1.50 each; 5 for \$6.50; 10 for \$12.00.

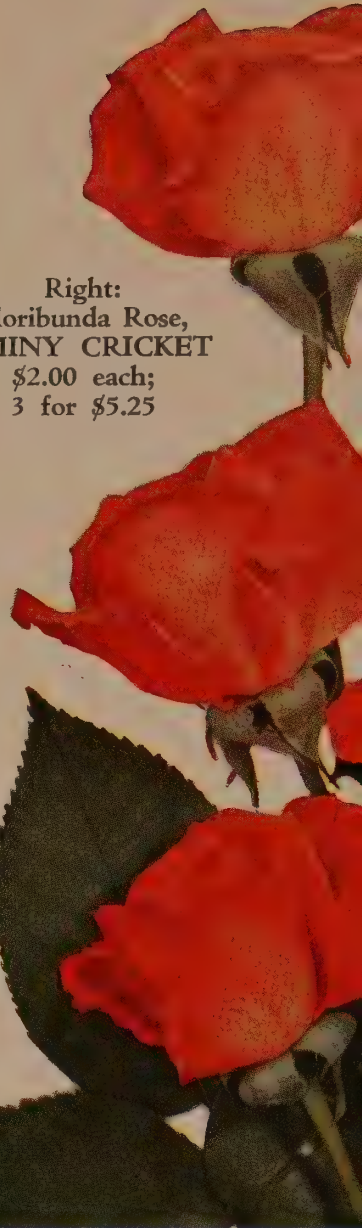

GOLDEN SALMON—Produces large clusters of salmon orange flowers all summer long. Nice, bushy, well shaped plants grow 18 to 24 inches high. Extremely hardy. Excellent for cemetery planting. \$1.50 each; 5 for \$6.50; 10 for \$12.00.

HARDY PERENNIALS that bloom for weeks

ALYSSUM SAXATILE COMPACTUM (Basket of Gold)—(Pictured on opposite page). An excellent low border or rock garden plant growing about 9 inches high. Almost as soon as the winter is over it becomes a mass of yellow gold. A fine companion to spring bulbs. 60c each; 4 for \$2.20; 10 for \$5.00.

New HARDY ASTERS

(Pictured to the left.)

THE ARCHBISHOP—Mammoth blossoms are produced in great sprays of deep blue-purple. Grows upright, about 3½ feet. Excellent for cutting. 80c each; 4 for \$3.00; 10 for \$7.00.

BEECHWOOD CHALLENGER—Considered the best red of all asters. Forms a well branched bush 3 to 3½ feet that is completely covered with these entrancing red flowers. September till frost. 70c each; 4 for \$2.60; 10 for \$6.00.

BLUE PLUME—Stately; effective spikes covered with the finest rich blue flowers. Almost double. Very choice, 3 to 3½ feet tall. 70c each; 4 for \$2.60; 10 for \$6.00.

HARRINGTON'S PINK—Produces beautiful silvery rose pink flowers in clusters continuously from early September till frost. Striking show in the garden. Valuable cut flower. 70c each; 4 for \$2.60; 10 for \$6.00.

JANET McMULLEN—Perhaps the largest flower of any hardy Aster. Soft rose-pink blossoms are massed gracefully along the stems. Grows about 3½ feet tall. 80c each; 4 for \$3.00 10 for \$7.00.

EVENTIDE—A masterpiece from England. Striking deep violet-blue, huge and almost full. Trimly erect, free and vigorous. Fine for cutting. 3 ft. 80c each; 4 for \$3.00; 10 for \$7.00.

BABYSBREATH

Valuable perennial, used as "filler" for bouquets. We offer the following varieties:

BRISTOL FAIRY—(Pictured to the left.) The large double white Babysbreath. \$1.00 each; 4 for \$3.80; 10 for \$9.00.

PACIFICA—Starry pink blossoms on branching panicles. Artistic, showy and one of the best. 60c each; 4 for \$2.20; 10 for \$5.00.

ROSY VEIL—A new, dwarf pink, double-flowering Babysbreath. They start blooming 2 weeks earlier than other varieties and continue later in the garden. Very dwarf and compact, it is ideal for edging borders. Fine for cutting. \$1.00 each; 4 for \$3.80; 10 for \$9.00.

SINGLE (Paniculata)—Old fashioned favorite. Fine mist-like flowers. Just the thing to lighten bouquets, especially roses. 50c each; 4 for \$1.80; 10 for \$4.00.

BLEEDING HEART—The old-fashioned hardy kind of grandmother's garden. Beautiful pink flowers in May. \$1.30 each; 4 for \$5.00; 10 for \$12.00.

HARDY CARNATIONS—Pictured on opposite page. Carnations begin blooming in early summer and continue until frost. Flowers are bright, showy clear colors and are excellent for cutting. Very hardy. We offer your choice of three colors: RED, PINK and WHITE. 55c each; 4 for \$2.00; 10 for \$4.50.

HARDY CARNATION SPECIAL	} 1 FLAME KING 1 PINK BEATRIX	Both for
		\$1.15

FLAME KING CARNATION—Blossoms from early summer until hard frosts. The flowers are very bright fiery crimson and are excellent for cutting. Will bloom the first season. 60c each; 4 for \$2.20; 10 for \$5.00.

PINK BEATRIX CARNATION—This is the best of all hardy pink carnations. Healthy, hardy plants bear lovely, clear, deep pink flowers all through the season. 60c each; 4 for \$2.20; 10 for \$5.00.

COREOPSIS, MAYFIELD GIANT—(Pictured on opposite page). This variety is more vigorous with larger flowers and longer stems than common Coreopsis. The color is a rich golden yellow. Blossoms nearly all summer. Has no equal for cutting or for garden effect. 50c each; 4 for \$1.80; 10 for \$4.00.

COLUMBINE

McKANNA GIANT HYBRIDS—(Pictured to the right). A new strain of larger flowers, longer spurs and a much richer color range. Excellent for cutting. 55c each, 4 for \$2.00; 10 for \$4.50.

SILVER QUEEN—Extra large long spurred flowers of showy silvery white. Very fine. 55c each; 4 for \$2.00; 10 for \$4.50.

★ **SPECIAL**—Mixed colors, not labeled. 4 for \$1.80; 10 for \$4.00.

DAISIES

MARGUERITE (June or Elder) DAISY—Hardy white daisies similar to the Shasta except the flowers are slightly smaller. Always in bloom for Memorial Day. 60c each; 4 for \$2.20; 10 for \$5.00.

SHASTA DAISY, Giant Alaska—(Pictured to the right). Large and popular strain that starts blooming in June and will continue until frost if flowers are kept picked. 60c each; 4 for \$2.20; 10 for \$5.00.

PAINTED DAISIES—See Pyrethrum on page 30.

DELPHINIUMS—No perennial garden is complete without Delphiniums. We offer the following two varieties which we have found best suited for this region. Price (either variety): 60c each; 4 for \$2.20; 10 for \$5.00.

BELLADONNA IMPROVED—Exquisite light or turquoise blue. Two feet. Blooms all summer and fall.

BELLAMOSUM IMPROVED—Similar to Belladonna Improved except the flowers are large deep blue, uniform in color and with a white bee.

GAILLARDIA, Burgundy—A striking wine-red variety. Large flowers on long stiff stems. June until fall. 60c each; 4 for \$2.20; 10 for \$5.00.

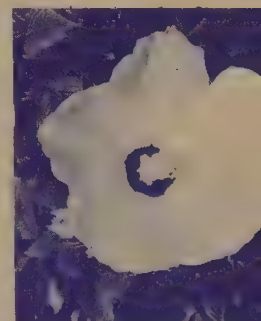

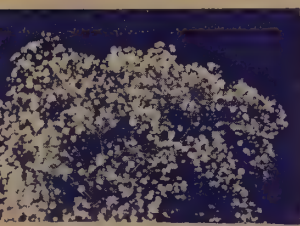

GAILLARDIA, Goblin—(Pictured on opposite page). A new variety. Very compact, globular plants; not as loose and open as most other varieties. The flowers are rich red, fringed with bright yellow. A striking bicolor. 60c each; 4 for \$2.20; 10 for \$5.00.

HELIANTHUS—(Pictured to the right). Sometimes called Hardy Dahlia or Hardy Double Sunflower. Large double dahlia-like flowers on long stems excellent for cutting. Rich sunflower yellow. Blooms from mid-summer until frost. Grows 3 to 4 feet high. 60c each; 4 for \$2.20; 10 for \$5.00.

HEUCHERA ROSAMUNDI—(Coralbells). The most desirable of all the Corabells. It is a strong grower, not subject to diseases and produces an abundance of fine coral-pink blooms on tall, strong stems which last over 2 months. 80c each; 4 for \$3.00; 10 for \$7.00.

HIBISCUS—(Pictured to the right). Also called Rose-Mallows, are herbaceous shrubs bearing huge showy flowers usually about 6 inches across. Extremely hardy and will grow in hot dry locations. They bloom from July until frost when other flowers are scarce. Grow about 4 ft. high. Tops die down each winter and must be cut back each spring like Butterfly Bush. It makes a full size bush each season before summer. Mixed colors only. 70c each; 4 for \$2.60; 10 for \$6.00.

HOLLYHOCKS, DOUBLE—(Pictured on opposite page). Tall spikes of lovely double flowers that resemble crepe-paper rosettes. Red, pink and yellow. 60c each; 4 for \$2.20; 10 for \$5.00.

POTTED ROSES

BLOOMING PLANTS IN SPECIAL REMOVABLE CONTAINERS CAN BE PLANTED ANY TIME . . . WITHOUT SETBACK OR LOSS

If it is impossible for you to plant your roses during the spring planting season, when the plants are dormant, you need not despair. YOU CAN PLANT THESE POTTED ROSES ANY TIME DURING THE SUMMER AND FALL.

Early in the spring, at the proper time, we plant, in these special removable containers, in SPECIALLY PREPARED SOIL, a large number of roses (some of every variety we list here in our catalog. Late in May, when it begins to get too late to plant dormant roses, these fine plants are in bloom and are ready for sale. It is much to your advantage to drive to our nursery, pick out your plants first hand and take them away in your car. If you are not able to do this, we crate and ship them to you by way of express or truck freight, charges collect. Each pot and rose weigh about 12 pounds, so 5 or 6 roses will travel cheaply as one. Not prepaid.

PRICES: The EACH price for each variety, plus 50 cents each for potting (Thus a potted plant of Peace would sell for \$3.00 each; a potted plant Vogue would sell for \$2.50, etc.).

STURDY, HEALTHY, VIGOROUS APPLE TREES ESPECIALLY ADAPTED TO OUR GREAT PLAINS REGION. These trees are graded to 9/16 to 11/16 inch trunk caliper and will be 4 to 6 feet tall. They are too large to mail, so must be sent express or truck freight, collect.

ANOKA—A wonderful new Summer Apple which often starts to bear the next year after planting. The fruit is red with yellow streaks, large and good flavor. Ripens in August. Very hardy. \$2.10 each; 3 for \$6.00.

RED DELICIOUS—We consider this to be the finest of all red apples. The fruit is large, solid red and has a delicious flavor, unequaled by any other apple. It bears younger, keeps longer and the fruit colors up several weeks earlier than the common Delicious. \$2.10 each; 3 for \$6.00.

EARLY HARVEST—Well known yellow Summer apple. Ripens in July. \$2.10 each; 3 for \$6.00.

RED JONATHAN—Same as the regular Jonathan except it colors earlier and has a richer color. Bright red, highest quality, crisp, tender, juicy and full of snap. You cannot beat it. \$2.10 each; 3 for \$6.00.

WINESAP—Bears heavily, medium size, dark red, fine flavor. Fruit keeps until spring. \$2.10 each; 3 for \$6.00.

YELLOW DELICIOUS—Some consider this the best yellow apple. Fruit is large, juicy and high quality. Bears young and heavily. \$2.10 each; 3 for \$6.00.

YELLOW TRANSPARENT—Old favorite early Summer apple. Bears young and heavily. Ripens in July. \$2.10 each; 3 for \$6.00.

FRUIT TREES

APRICOTS

Apricots are worthy of a place in your yard, as an Ornamental Tree as well as a Fruit Tree.

MANCHURIAN—One of the greatest hardy fruit introductions in years. These Apricots are hardy even into the Dakotas. Medium size, golden-orange fruit. Produces heavily. Not prepaid. 4 to 6 feet (9/16" to 11/16" diam). \$2.75 each; 3 for \$7.95.

MOORPARK—An excellent producer in our area. Freestone, large yellowish-green fruits with red blush on the sunny side. An excellent variety for drying. Not prepaid. 4 to 6 feet (9/16" to 11/16" diam). \$2.75 each; 3 for \$7.95.

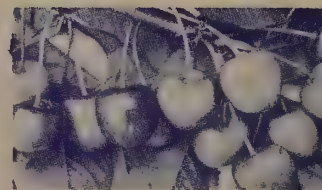

CHERRIES

Without a doubt, Cherries are the most satisfactory fruit for the Great Plains Region. No farm should be without several cherry trees, and there is room for a few in nearly every city back yard. The best varieties for this region are:

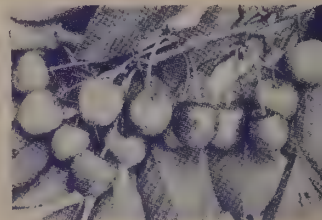

EARLY RICHMOND—(See picture to the right.) Favorite early Cherry. First to get ripe (in May). Large, bright red, juicy and delicious. Can't be beat for fresh cherry pies. 4 to 6 feet (9/16" to 11/16" diam.) \$2.75 each; 3 for \$7.95. Not prepaid.

MONTMORENCY—(See picture to the right.) A sure bearer of large crops, ripening about ten days after Early Richmond. The fruit is large, flesh firm and fine flavor. Best of all for canning. Widely planted. 4 to 6 feet (9/16" to 11/16" diam.) \$2.75 each; 3 for \$7.95. Not prepaid.

ENGLISH MORELLO—(See picture to the right) Bears younger and heavier than any other cherry. The fruit is good size, almost black and sprightly acid. Ripens in July after the others have gone. 4 to 6 feet (9/16" to 11/16" diam.) \$2.75 each; 3 for \$7.95. Not prepaid.

SAPA

WANETA—Considered most famous of Hansen's hybrid plums. Fruit is large and bright red. Flesh is yellow, sweet and juicy. Bears young and regularly. Not prepaid. \$2.65 each; 3 for \$7.65.

STANLEY—(Pictured to the right.) A new prune-type plum that is rapidly becoming the most popular of all plums. Large dark blue prune-shaped fruits. The rich yellow flesh is firm, sweet and delicious. Ripens in September. Freestone. Not Prepaid. \$2.65 each; 3 for \$7.65.

STANLEY

In addition to being one of our most valuable fruit trees, their beautiful snowy white blossoms in combination with Red Bud trees (which bloom at the same time) make a color combination and landscape effect unexcelled. Most varieties, especially Kieffer, grow rather narrow and upright, giving a "Poplar" effect. Not prepaid.

Heavy, Sturdy (9/16 to 11/16" diam.) 4 to 6 foot trees.

BARTLETT—Large, yellow with blush. Juicy, sweet and high quality. Leading summer pear. Not prepaid. \$2.65 each; 3 for \$7.65.

DOUGLAS—We consider this the best Pear for this region. The tree is vigorous, hardy and especially adapted here. It is a fall Pear that bears heavily and often starts bearing the next year after planting. Fruit is large, yellow with blush. Not prepaid. \$2.65 each; 3 for \$7.65.

KIEFFER—Widely planted winter Pear. The tree bears heavily, is very hardy, vigorous and grows upright. Sometimes is used in the landscape in place of slender poplars. Not prepaid. \$2.65 each; 3 for \$7.65.

"SEE DWARF FRUIT TREES—PAGE 40."

DWARF FRUIT TREES

EASIER TO PICK BEAR YOUNGER LARGER FRUIT

These dwarf fruit trees are fast becoming the most popular fruit stock in the great plains region because their dwarf habit of growth makes it possible for the average home-owner to grow fruit in his yard, even if space is limited. Even commercial orchardists are planting these dwarf fruit trees because they produce earlier, often a year or two after planting. Also, they are easier to grow, and they bear larger fruit. NOTE: In planting all dwarf fruit trees, be sure the bud or graft union is above the ground level.

Dwarf Apple

DWARF JONATHAN DARK RED—Produces full size dark red fruit just like the regular Jonathan Apple. Highest quality, crisp, tender, juicy and full of snap. Tested and approved in this area. Not prepaid. Sturdy, 2-year trees (7/16" diam.) \$3.75 each; 3 for \$10.95.

Dwarf Cherry

NORTH STAR CHERRY—Recommended by Kansas State University. The tree grows to be little more than 6 feet tall. Fruit is large, dark red and with a sprightly flavor. Bears young and heavily. Self-pollinating and very hardy—can be grown farther north than other varieties. Not prepaid. Sturdy trees (7/16" diam.) \$3.30 each; 3 for \$9.00.

Dwarf Pear

DWARF BARTLETT PEAR—Dwarf form of the hardy and very popular Bartlett Pear (see page 39). Fruit is large, yellow with blush. Not prepaid. Healthy, strong (7/16" diam.) trees. \$3.30 each; 3 for \$9.00.

Dwarf Peaches

DWARF ELBERTA PEACH—Dwarf selection of the popular Elberta Peach listed on page 39. Large, yellow and juicy fruit. Freestone. Self-pollinating and hardy. Not prepaid. Strong 3 to 4 foot trees. \$3.30 each; 3 for \$9.00.

DWARF RED HAVEN PEACH—Dwarf variety of the hardy Red Haven listed on page 39. Freestone, almost red with yellow flesh. Self-pollinating and hardy. Not prepaid. Strong 3 to 4 foot trees. \$3.30 each; 3 for \$9.00.

Here's How To Order Nursery Stock Produced In The Great Plains Region.

ORDER BY MAIL WITH CONFIDENCE

Our thirty-five years of experience in handling mail orders, our fields of growing stock right here in Salina, and our modern storage and packing facilities enable us to handle your order, no matter how small or how large, with speed and efficiency. If it is impossible for you to drive to Salina for your nursery stock, do not hesitate to order by mail. Your order will receive our most careful attention.

PARCEL POST EXPRESS & FREIGHT

All items marked "NOT PREPAID" or "NOT POSTPAID" are too large or too heavy to be accepted by our Post Office for mailing. These items are sent to you either by way of Railway Express or Motor Freight, freight charges collect. If you have a preference, please tell us. If you do not state a preference, we will choose the most economical method.

ADD 10% FOR POSTAGE & PACKING

All items that are NOT marked "NOT PREPAID" or "NOT POSTPAID" are mailable. With the rapidly increasing fourth class postal rates, we ask you to add 10% to the total of your order to help cover part of the cost of postage and packing.

ORDERING MAILABLE AND NON-MAILABLE ITEMS TOGETHER

If you order some mailable items and some items that are not prepaid, it is not necessary for you to add the 10% for postage and packing, since the mailable items can travel right along with the heavier or larger items, usually at no further expense.

MINIMUM WEIGHT SHIPMENTS

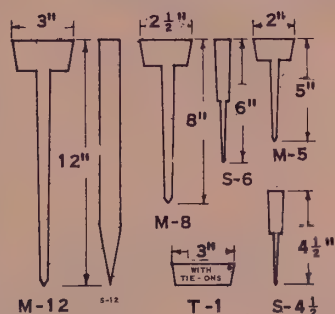

It is well to remember that freight companies have a minimum weight shipment. In other words, 5 or 6 trees or shrubs will generally travel for the same rate as just 1 tree or shrub.

SHIPPING AT PROPER PLANTING TIME

Different types of nursery stock and seeds are not shipped together. Depending upon your order, different items may reach you at different times; however, you may be sure the items of your order will reach you at the proper time for planting.

STATE SALES TAX

The Kansas law requires us to collect a 2½% sales tax on all orders sent us by residents of Kansas. If you live in Kansas, please add this amount to your order.

PYLON PLASTIC PLANT MARKERS

ECONOMICAL - PRACTICAL - PROFESSIONAL - CLEAN - NEAT - REUSABLE

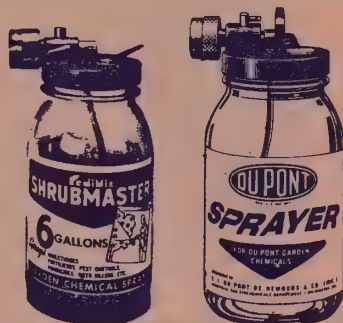

We use this label or marker in our own fields, so we can recommend it to you very highly. Made of white polystyrene plastic, they are practically indestructible. Use only a soft lead pencil for fade-proof marking. They are cleaned quickly for reuse with scoring powder and a damp cloth.

LAWN SEEDS AND GRASSES

the new U-3 GRASS

U-3 GRASS, developed by the United States Department of Agriculture, is something new and different in creeping grasses. In fact, it still bears its experimental number, U-3, instead of a name. U-3 is a Bermuda grass similar to Velvet grass in texture but far superior in color and every other respect.

The color of U-3 GRASS is a dark, rich, satisfying green lasting longer into the cold winter weather and appearing earlier in the spring than Velvet grass and common Bermuda. Mowing is not a problem with the low-creeping growth habit and fine texture of U-3 GRASS. Its thick, carpet-like turf eases the crabgrass and weed control problem so common to lawns in this area.

U-3 GRASS is sold by the square foot of sod. When planted according to instructions (furnished with each order), each square foot of sod will plant from 20 to 50 square feet of lawn area. Between June 1st and August 1st is the best time to plant. It should not be planted in the fall or before May 15th in the spring. Our supply is very limited. Order yours early to be sure it will be shipped at the proper time. CAUTION: U-3 GRASS does not produce seed. It can be started only from the sod or roots. We recommend U-3 GRASS for the sunny lawn area only.

PRICES:

5 square feet of U-3 sod	\$ 3.00	Not prepaid
10 square feet of U-3 sod	4.50	Not prepaid
50 square feet of U-3 sod	20.00	Not prepaid
100 square feet of U-3 sod	35.00	Not prepaid

For additional information on U-3 Bermudagrass and instructions on how to plant it, simply drop us a postcard. We will be glad to send it to you by return mail.

Merion Bluegrass

The new super Bluegrass that spreads rapidly into a handsome, wear-resistant sod. Its color is a deeper green than regular Bluegrass. New Merion Bluegrass forms a dense, compact turf that is resistant to heat, drought and most common lawn diseases. Since this turf is dense and compact, it requires less mowing than ordinary Bluegrass. It is more resistant to weed infestations, particularly crabgrass. It is adapted to full sun or partial shade. Merion Bluegrass goes about three times as far as Kentucky Bluegrass . . . one pound plants 500 to 700 square feet.

Meyer Z-52 Zoysia

BUILD A PERMANENT LAWN THAT CRABGRASS AND WEEDS CAN'T RUIN . . . THAT KEEPS ITS RICH GREEN COLOR THROUGH HOT, DRY WEATHER.

The new, superior lawn grass, Meyer Z-52 Zoysia, makes a permanent lawn with a dense turf that chokes out crabgrass and weeds. It grows best in hottest weather, gives you a beautiful, deep green lawn when you want it most, during the hot summer months when usual grasses wilt and burn out. Meyer Z-52 Zoysia will not grow in dense shade; and it loses its color after heavy frost, regaining it again in the spring. It is easily overseeded with Merion Bluegrass for winter color.

Meyer Z-52 Zoysia is furnished as 1 3/4 inch plugs of sod. These plugs should be set out on 12 to 18 inch centers. Between June 1st and August 1st is the best time to plant. It should not be planted in the fall or before May 15th. If planted at the proper time, it will become established and start to spread this year and will cover completely next spring and summer.

Meyer Z-52 Zoysia cannot be grown from seed. It must be set out as actual plugs of sod. Simple planting instructions accompany each shipment.

triple-tested LAWN GRASS MIXTURE

A HIGH QUALITY, SUPERIOR FORMULA, ESPECIALLY BLENDED FOR BEST RESULTS IN OUR AREA.

After extensive experimentation and testing, Mandeville has produced a special blend of high quality perennial grasses. Mandeville Lawn Mixture is triple-tested for germination, quality of grasses and purity. Now it becomes a fit companion of Mandeville triple-tested flower seeds, planted by generations of gardeners for best results.

Formulated from Kentucky Bluegrass, Creeping Red Fescue, Poa trivialis, Highland Bentgrass and Redtop, all superior perennial grasses, this mixture is designed to make a permanent lawn of thick, long-wearing turf of rich green color. It will grow well in sun or shade. It is quick to become established, giving a fine appearance the first year and every year thereafter. Use at the rate of 3 pounds per 1000 square feet.

1 pound bag	\$1.29
5 pound bag	5.95

Kentucky 31 Fescue

A recent development with a very deep root system and is drought resistant. It stands up under traffic and though coarse is excellent for temporary lawns and lawns where there is heavy traffic. Plant 1 pound for every 100 square feet of lawn area.

Moraine Ash - see pages 51

Bald Cypress

This is an evergreen that actually sheds its leaves. It is the same tree that grows in the southern swamps, however, it is perfectly hardy in the great plains region. Its foliage is delicate and feathery and is a soft, bright, light green, turning a brilliant orange-brown before falling for the winter. Makes an excellent tree since it does not compete with grass for shallow nutrients and water. Rarely affected by insects and diseases. Container grown specimens, not prepaid.

Sizes	Each	Per 2	Per 4
3 to 4 ft.	4.75	9.30	18.00

Catalpa

Cottonwood

The official state tree of Kansas. Because this tree is so fast growing, hardy, drought-resistant and rugged, it was planted by the pioneers and early settlers in Kansas. It played an important role in Kansas History. It still deserves to be planted more than it is. It is not affected by freezes. It is also valuable for windbreaks and the farm wood-lot. It will grow into valuable lumber in a short time. Not Prepaid.

Hopa Flowering Crab

Red buds opening to a bright pink blossom. Very upright and narrow in growth. Our hardiest and most popular variety. Not prepaid.

4 to 5 feet.....\$3.00 each; 2 for \$5.80

American Elm

We like to think of this tree as typically "American." Stately, upright growing, yet spreading, hardy and long-lived. While it is not fast growing, if given good care, it will develop into a large tree in just a few years. It is native of Kansas and deserves to be planted more than it is. The American Elm is valuable for street, yard, park, farm and wood-lot planting. Not affected by freezes. Not Prepaid.

Chinese Elm

Because of its beauty, its extremely rapid growth, its resistance to disease and insects as well as heat and drought, the Chinese Elm has become popular. Under ordinary conditions, it grows 5 feet a year; in just a few years it becomes an excellent shade tree. It is valuable for those parts of our country where most other trees will not thrive where it is hot, dry or in alkali soil. (See page 12 for seedlings). Not prepaid.

KANSAS HYBRID ELM

These trees have been grafted from selected, mature parent tree which has shown every ideal characteristic for a Hybrid Elm. The Hybrid Elm, a cross between the American Elm and the Chinese Elm, shows all the stability, ruggedness and long life of the American Elm, yet it grows just as fast and is just as resistant to heat, drought and insects as the Chinese Elm. It will not be as subject to breakage from ice, snow and windstorm. The Hybrid Elm has large leaves like the American Elm and is not twiggy like the Chinese Elm. Our supply is very limited. Not prepaid.
